LeetCode

Professional Summary

Computer Science undergraduate with 12 months of Full Stack Python internship experience and hands-on project work in Python, Django, FastAPI, REST APIs, PostgreSQL, SQL, and machine learning. Built database-backed web applications and an ML-powered loan default prediction API. Seeking an entry-level Python, backend, or full-stack software development role.

Technical Skills

Languages: Python, SQL, C++, C, JavaScript

Backend & APIs: Django, Django REST Framework, FastAPI, REST APIs, JWT Authentication

Databases: PostgreSQL, MySQL, Django ORM

Machine Learning: Pandas, scikit-learn, Logistic Regression, Data Preprocessing, Model Evaluation, Joblib

Web & Tools: HTML, CSS, JavaScript, Git, GitHub, VS Code, Anaconda

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Experience

Full Stack Python Intern

July 2025 – June 2026

OCAC

12 Months

- Worked on full-stack Python development during a 12-month internship.
- Built web applications using Python and worked with frontend, backend, and database concepts.

Projects

Loan Default Risk Prediction API

GitHub

Python, Pandas, scikit-learn, FastAPI/Django, PostgreSQL, JWT

- Built a machine learning model to predict loan default risk using Logistic Regression.
- Prepared the dataset with Pandas, evaluated the model, and saved the trained pipeline for predictions.
- Created a prediction API and connected PostgreSQL to save prediction history.
- Added JWT authentication to secure API endpoints.

Expense Tracker

GitHub

Python, Django, SQL, HTML, CSS, JavaScript

- Built a Django application to track and manage daily expenses.
- Added create, update, and delete features and used Django ORM to store expense data.

Real-Time Social Media Platform

GitHub

Django, MySQL, HTML, CSS, JavaScript

- Built a Twitter-inspired Django application with authentication, profiles, posts, and user interaction features.
- Used Django ORM with MySQL and created a responsive web interface.

Fake News Detection

GitHub

Python, Machine Learning

- Built a machine learning model to classify news articles as fake or genuine using text preprocessing.

Education

B.Tech in Computer Science

2024 – 2027

GITA University, Bhubaneswar

CGPA: 7.0+

Diploma in Engineering

2020 – 2023

Coding Profile

- Solved 25+ Data Structures and Algorithms problems on LeetCode.
- Built and maintained 5+ personal software projects on GitHub.
